

Since the Photokina 2010, a waterproof and resistant COMBITUBE carrier bag is available again (COMBI-Bag). This black bag, manufactured in Switzerland following traditional methods stands out for its manifold possibilities of usage. The various internal compartments and pockets it comprises hold all possible COMBITUBE elements. Even items bigger than the bag, like background paper rolls or TT-Plast sheets rolled up may be taken along for on site shootings.

Its immediate success after launching induced FOBA to extend its range: now, the two appreciated COMBITUBE kits CAMIN and CAMID are also available in the carrier bag.

CAMIN-Bag

6 CONRO AS	COMBITUBE 80 cm, aluminium black
