

DIMIC L Versatile Mini Shooting Table

FOBA's mini shooting table **DIMIC L** complements well the lower part of the product range. It is just as sturdy as the bigger models; it is easily dismantled or mounted, has a mat surface, a colour-fast sheet and is basically shadowless. It corresponds to the shooting table DIMIC but without the COMBITUBE* elements. On the other hand, at any time it can be complemented by the COMBITUBE* elements of the DIMIC shooting table.

This table is especially adequate for small objects, even if they are heavy. The most comfortable way to perform shootings with it is to put it on a table.

DIMIC L mini shooting table

DIMIC L can be easily assembled / disassembled without any tools. Thus it can be stored in a very space-saving manner.
