

## For studio safety without compromise.

FOBA, the quality leader in studio stands, has designed the **FOBA DSS-ALPHA** studio stand for the toughest demands and greatest security. Whether for conventional large format photography or the most demanding digital cameras, more and more professional photographers demand a stand that offers reliable performance day in and day out, with 100% stability and convenience. So the FOBA engineers took another look at our best products and optimized all kinds of details. The result is another step closer to perfection: **FOBA DSS-ALPHA** stand.

## SECURITY, MOBILITY, STABILITY

Shaft and beam of solid hexagonal profiles, guaranteed distortion free. A camera can be mounted at each end of the beam.

FOBA DSS-ALPHA stands come in standard overall floor height and weight of 2,7 m and 204 kg. Lifting capacitiy without additional counterweight: 10 kg. Customized heights are available at an extra charge. Delivered with a rotating platform AROBA.

High-precision scales calibrated in inches and cm for exactly repeatable settings.

Rotating crosspiece graduated in degrees runs light as a feather on no less than 24 ball-bearings together with the horizontal beam.

## Double pedal

This sophisticated mechanism lowers the stand onto the floor or raises it onto the wheels without much effort.

The stand can be lowered onto the floor very gently thanks to its built-in shock absorber.
